

Construction worker and electrician's knives

Morakniv™ Craftsmen are construction/specialty knives that have been developed in close collaboration with various professional categories within the construction industry. The common denominator for specialty knives is that they are ergonomically sound, efficient and safe to use.

Morakniv™ Craftsmen – insulation knives 223, 333 and 7350 – insulation knives (333 and 7350) have blades of cold-rolled special stainless steel from Sandvik and a 350 mm blade length. Insulation knife (223) has a carbon steel blade and a 223 mm blade length. Two of the knives (223 and 333) have a smooth edge, while (7350) has a specially serrated edge. Smooth-edged knives are suitable for cutting fabric covered mineral wool. All the knives have ample handles that fit your hand even when wearing gloves.

Morakniv™ Craftsmen – carpet/roofing felt/leatherknife 175 – carbon steel blade. Oiled birchwood handle. The blade may be warmed heated without it loosening from the handle. Blade length 58 mm.

Morakniv™ Craftsmen – carpet/roofing felt/leatherknife 175P – carbon steel blade. Plastic handle designed to give maximum pulling force. Blade length 58 mm.

Morakniv™ Craftsmen – electrician's knife 1240 – the classic all-around knife for electricians with a carbon steel blade. The symmetrical birchwood handle ensures the knife always fits correctly into your hand no matter how you hold it. Blade length 65 mm. Plastic sheath.

Morakniv™ Craftsmen – electrician's knife 931 and 931T – perfect knives for cable scaling. Carbon steel blade. The 931T model has a serrated edge. Plastic handle. Blade length 34 mm. Plastic sheath.

Morakniv™ Craftsmen – punch knife 561 – thin, tapered blade of carbon steel. Plastic handle with substantial finger protection. Blade length 75 mm.

Morakniv™ Craftsmen – chisel knife 712 – carbon steel blade with V-sharpened edge. Plastic handle with patterned high-friction grip. Impact resistant. Plastic sheath.

Morakniv™ Clipper Rescue – with a patterned high-friction grip and serrated blade that has been developed for cutting rope, nylon and fiber. Blade of cold-rolled special stainless steel from Sandvik. Plastic fluorescent sheath with a belt clip. Blade length 100 mm.
